PROJECTS

1- [Dermstore](#)

About

It's an online e-commerce website that sells beauty products in USA.

Tech Stack

- Html, Css, Javascript
- Collaborative project, accomplished along with 4 team members in 4 days

Role-

- To create dummy database for different brands and show it on brands section page.
- Anyone should be able to use that code at any section where required.
- Also I was assigned to handle all routes of all pages.

2- [Envoy Website](#)

About

This website handles all logistics related things related to office work or delivery of general things.

Tech Stack

- Html, Css and Javascript
- completed in 4 days along with 3 members

Role-

- To make products page and make responsive using grid property.
- Make dynamic parts working for that page.
- To make sure there were no conflicts when pushing the code, and resolve if there comes any.

3- [Phlipkart](#)

About

This is clone of popular e-commerce website www.flipkart.com.

Tech Stack

- We used Html, Css, React.js and Material-UI
- Completed along with 2 members in 5 days.

Role

- To prepare home page of website and create json server and maintain data there to fetch for use.
- Created checkout page where user can purchase an item if logged in, else user need to login first.
- To use material UI library to give it similar look as original.
